

Chr. Olesen Group Quality Policy

Chr. Olesen Group is committed to delivering safe and high-quality products that ensure customer satisfaction and consistent compliance with applicable certification and regulatory requirements within Feed, Food, Pharma and Technical Industries.

This policy provides a framework for setting and reviewing quality objectives and supports continuous improvement of our well-established Management System.

Chr. Olesen Group works only with trusted, high-quality manufacturers and suppliers that meet our product safety and quality requirements.

We work to maintain and improve a strong quality and safety culture, supported by effective systems and processes that ensure safety and quality across all activities, products, and services within the international Chr. Olesen environment.

To achieve this, we:

- Select, approve, and evaluate well-established manufacturers and suppliers who meet high standards of quality and service
- Approve products through documented risk assessments processes
- Ensure qualified and secured transparent supply chain operations to prevent fraud and product adulteration
- Maintain clear and accurate documentation through our Management System
- Ensure full traceability across the end-to-end supply chain
- Strengthening product safety and quality through continuous system improvements
- Identify and monitor relevant interested parties, customers and their requirements

The overall Management of Chr. Olesen is committed by providing the necessary resources to implement, maintain, and continually improve the management system.

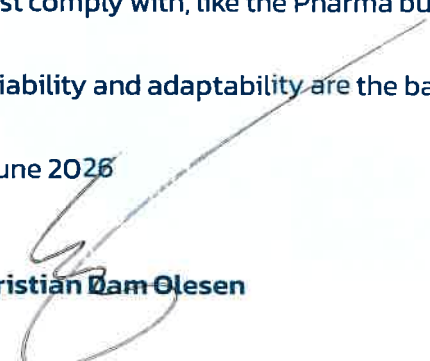

Our employees are highly skilled in their areas of responsibility. Their competences and awareness are continuously developed through training programs supported by the Management.

The Quality Policy is mandatory for all entities in the international Chr. Olesen Group.

For some entities, legal requirements might include additional demands that Chr. Olesen Group must comply with, like the Pharma business.

Reliability and adaptability are the basis for Quality in everything we do.
